

FILTER GUIDE

COLOUR CODE	FILTER CODE	FIELD OF APPLICATION
	P3	Solid, liquid, toxic and radioactive particles, bacteria and viruses
	A2A1	Organic vapours and solvents
	B2B1	Acid gases, halogens (e.g. chlorine), hydrogen cyanide and hydrogen sulphide
	E2E1	Sulphur dioxide and acid gases
	K2K1	Ammonia
	A2B2E2K2 A1B1E1K1	Organic vapours, solvents, inorganic gases, organic acids, sulfur dioxide and ammonia
	A2B2	Organic vapours, solvents, acid gases, halogens (e.g. chlorine), hydrogen cyanide and hydrogen sulfide
	AX *	Organic vapours and solvents with a boiling point under 65°C
	E2P3	Sulfur dioxide, acid gases, solid, liquid, toxic and radioactive particles, bacteria and viruses
	K2P3	Ammonia, solid, liquid, toxic and radioactive particles, bacteria and viruses
	A2P3	Organic vapours, solvents, solid, liquid, toxic and radioactive particles, bacteria and viruses
	A2B2P3	Organic vapours, solvents, acid gases, halogens (e.g. chlorine), hydrogen cyanide, hydrogen sulfide, sulfur dioxide, solid, liquid, toxic and radioactive particles, bacteria and viruses
	A2B2E2K2-P3	Organic vapours, solvents, acid gases, halogens (e.g. chlorine), hydrogen cyanide, hydrogen sulfide, sulfur dioxide, ammonia, solid, liquid, toxic and radioactive particles, bacteria and viruses
	AXP3 *	Organic vapours and solvents with a boiling point under 65°C, solid, liquid, toxic and radioactive particles, bacteria and viruses
	Reaktor-HG-P3	Radioactive iodine and its organic compounds, mercury and mercury compounds, solid, liquid, toxic and radioactive particles, bacteria and viruses
	A1E1-HG-P3	Organic vapours, solvents, acid gases, hydrogen sulfide, sulfur dioxide, solid, liquid, toxic and radioactive particles, bacteria and viruses
	A2B2E2K2-HG-P3	Organic vapours, solvents, acid gases, halogens (e.g. chlorine), hydrogen cyanide, hydrogen sulfide, sulfur dioxide, ammonia, mercury and mercury compounds, solid, liquid, toxic and radioactive particles, bacteria and viruses
	A1B2E2K1-CO-NO-HG-P3 *	Organic vapours, solvents, acid gases, halogens (e.g. chlorine), hydrogen cyanide, hydrogen sulfide, sulfur dioxide, ammonia, carbon monoxide, nitrous gases, mercury and mercury compounds, solid, liquid, toxic and radioactive particles, bacteria and viruses
	CO-P3 *	Carbon monoxide, solid, liquid, toxic and radioactive particles, bacteria and viruses
	NO-CO-P3 *	Nitrous gases, carbon monoxide, solid, liquid, toxic and radioactive particles, bacteria and viruses

* These filters are single-use only

Source: Scott Health & Safety

THIS APPLIES TO HALF- AND FULL-FACE MASK FILTERS:

- The air must contain >17 vol% oxygen
- The type of pollution must be known
